

# Payments

A unified interface allowing to connect with **200+** payment providers and acquirers in a few clicks, getting a clear view and full control of all your transactions. Centralise, standardise, and streamline the way of accepting payments

## One integration

A single integration allows you to support any payment methods.

## No vendor lock

Work with multiple payment partners for continuity of operations.

## Unified payment data

Access payment data from disparate sources in one place.

## Conversion boost

Orchestrate cash flows across payment providers and acquirers

## How to accept payments with Corefy?

We provide a range of options for accepting payments both automatically, through hosted or self-hosted payment page and recurring payments, and manually, by issuing invoices on the Dashboard.

### Any

payment provider

payment method

fiat

crypto currency

## How does it help me maximise conversion?

Payments by Corefy are supported by smart processing capabilities, allowing to:

- ✓ **Route each transaction the most efficiently**, saving time and cutting costs.
- ✓ **Eliminate declines** by using automatic rerouting of a transaction until full completion.
- ✓ **Spot fraudulent transactions** in advance and avoid losses.
- ✓ **Reduce friction** with one-click payments.
- ✓ **Handle failover management** with manual and automatic retries.
- ✓ **Provide a smooth and personalised purchasing experience**.
- ✓ **Customise the payment page design and fields**.

- ✓ Identify and adapt to the user's geolocation.
- ✓ Remember and securely store customers' payment data for future purchases.
- ✓ Display prices and pay in the user's currency, while settling your balance in the currency of your choice.

Explore all capabilities

## How to earn money with it?

Offer Corefy's sophisticated payment gateway to your merchants under your brand and get extra revenue effortlessly. You're free to **decide how much to charge your merchants for any payment service**, and thus how much you'll earn.

Provide your merchants with our **ready-made back office** to let them handle operations and monitor their performance. In turn, you'd be able to keep track of all incoming and outgoing cash flows in multiple currencies in real time.

## How to keep track of all transactions?

Access detailed information on every transaction and its lifecycle through Dashboard, a feature-rich user interface to run day-to-day operations **without coding**. Make a few clicks to effortlessly accumulate the needed data into automatic reports and use it for further analysis.

- ✓ Advanced platform-wide search
- ✓ Team activity log
- ✓ Callbacks for updates on transaction status changes
- ✓ Provider statements and logs
- ✓ Direct access to a unified database
- ✓ Instant alerts when reaching crucial figures
