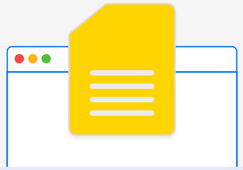
No integration hassless for your merchants

Provide your merchants with the opportunity to choose the most suitable payment page integration option for them.

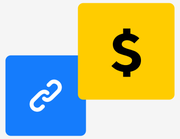
Flash

A popup on top of your merchants' website. Requires practically no coding effort and works without redirecting.



Embedded

Your merchants can easily add a payment page to their website as an iFrame, creating a frictionless user experience.



Pay by link

Merchants can generate payment links and send them to their customers to complete purchases.

Self-hosted

If your merchants have their own development team and are PCI DSS certified, they might consider hosting payment page themselves, using API and SDKs. With Corefy, you can make it possible for them.

Security is in our DNA
